- YouthHack Manila, Former Organizer
Promoting technopreneurship in the Philippines
- Philippine Robotics Team, Member - Adviser
National robotics competition and research group

CEO & FOUNDER

(JUN 2016 - PRESENT)

Developh

[DECK](#)

Nonprofit investing in innovation for social good through education & accelerator programs in developing ASEAN nations impacting >70,000 young people

- Organize the Philippine's first youth accelerator: outreach to provide pathways in tech for underserved students through offline & online programs and corporate/government/academic collaborations; manage investment fund with student scouts & partner VCs offering >\$5000 in grants and pro-bono services; design curriculum, acting product manager for over 8 incubatees
- Direct programming implemented in 10+ countries from hackathons to startup weekends; connected over 200+ students to career opportunities in tech; analyze & advise policy/pathways for Philippine student technopreneurship

TECH & PRODUCT DESIGN INTERN

(JUN 2019 - AUG 2019)

Rappler

Leading Manila-based news platform; first technology intern in a fast-paced environment developing an internal doc tool for the newsroom

- Developed & shipped a web application on Wiki.js from user research, mockups and iterative prototyping, to optimization & deployment on Docker
- Iteratively designed new modules and templates; wrote onboarding and maintenance documentation for new features and materials; streamlined authentication with existing systems and refactored Wiki.js database, CMS, and editor for ease of user access primarily with Figma (prototyping), Node.js, and Vue.js

#EARLYBIRD PARTICIPANT

(MAY 2019)

Twitter

One of thirty-five selected from over 5,000 to attend a five-day program at Twitter

- Collaboratively researched, designed, implemented, and pitched a new software feature to senior leaders under close mentorship from engineers

SOFTWARE & DESIGN FELLOW

(SEP 2018 - MAY 2019)

Luminus, Yale Helix

IoT-driven medical storage solution system targeting healthcare inefficiencies in hospital supply chains with HealthHavenHub and Yale School of Medicine

- Led development of MVP product decreasing time spent in supply rooms by 300%; leading front-end engineering, and product design for mobile/web app on React, Firebase, and Flutter for first release in <2 months; while conducting workshops for organization members on development and research practices
- Facilitate user research and usability trials with healthcare practitioners & providers; designed, presented, and approved new features for MVP based on user testing sessions; create mockups & prototypes; onboard potential adaptors

STUDY ABROAD & WEB DEVELOPMENT INTERN

(APR 2017 - MAY 2017)

Edukasyon.ph

- Designed multimedia for Study Abroad fair; performed on-ground and target marketing through Mailchimp, AdSense, & Facebook increasing reach by 300%
- Performed UI/UX research & design under the development team for the Study Abroad website, increasing user conversion by 230% on landing page

PROJECT

(SEP 2016 - MAY 2018)

Batid

Sociopolitical citizen security app for digital humanitarianism using social media streams (Twitter, Instagram, Facebook) and crowdsourcing to report incidents

- Lead project management, product design and front-end development on Firebase, Azure, React, leaflet.js; awarded by Microsoft Imagine Cup
